

Special Features

- LCD Display- Big Character 8X1
- Accuracy 0.1% of FS
- Optional RS 232 communication

Introduction:

This instrument has been designed to provide 4-20 mA current output from 24V loop powered supply. The o/p current is user programmable through front panel keypad and the delivered current value is displayed in LCD. Use of Industrial standard 8-bit embedded micro controller, in-built 16 bit DAC offer high accuracy and trouble free operation.

Specifications:

- O /p Range: 4-20mA @600 Ohm Resistive Load (Max)
- O/p mA Inc / Dec By means of UP/DOWN front panel keys.
- Decimal point fixed
- Power supply 24V DC +/- 6V
- Accuracy 0.1% of FS
- Dimension: 96 X144 X96 mm
